

JOHN DEERE REMAN

Short Block Engine

The John Deere Reman line of short block engines are designed to meet customer demands to minimize downtime and provide the customer a low-cost repair alternative. All John Deere short block engines are built and tested to provide you with the same John Deere quality products you are accustomed to.

Key benefits of John Deere remanufactured short block (vintage) assembly engines:

- Reduce customer downtime up to 50-percent or more when compared to an overhaul.
- Provides a cost competitive product compared with outside supplier rebuilding options or dealer overhauls.
- Provides known repair costs up front.
- Provides a one-year, unlimited-hour parts, labor, and consequential damage warranty if dealer installed.
- Provides a product remanufactured to stringent John Deere quality specifications using only genuine OEM parts and approved remanufacturing processes.
- Remanufactured not rebuilt.
- Short block assembly configuration
- Short blocks contain the cylinder block, crankshaft, connecting rods, pistons, camshaft, and front gear train. The cylinder head is not included.

When reduced downtime, higher quality, known repair costs, and company product support are important to you, look to John Deere Reman products for all your remanufactured component service solutions.
